About the TRAA

The TRAA Works at a Grassroots Level Within the Thames River Watershed to:

- protect, enhance and regenerate a viable, multi-species, year-round fishery.
- promote and participate in environmental clean-up, pollution control and rehabilitation. breed, relocate and stock to re-establish or augment appropriate species of fish.
- promote environmentally sound sport fishing practices.
- form partnerships with community businesses, government agencies, special interest groups, landowners, and other stakeholders in the Thames River watershed.
- increase public awareness of the unique diversity of the Thames River Watershed, its challenges, its

**MEMBERSHIPS
ARE DUE!
YOU GET TO BE
A TRAA MEMBER
FOR A WHOLE
YEAR FOR ONLY**

\$25.00 Dues Your membership also adds another voice to our efforts in protecting and enhancing aquatic habitats in the London & area community.

YOU'VE TAKEN A LOT OF ENJOYMENT FROM THIS UNIQUE FISHERY. IT'S TIME TO GIVE BACK BY BEING

"Hands-on Environmentalism" is what we do ...

This is what sets the TRAA apart from other clubs and organizations. You'll find us right in the water clearing obstructions from streams, measuring returning salmonids & taking scale samples for DNA analysis, education through trout hatchery tours & stream walks, being a voice for the Thames River watershed & its inhabitants and the list goes on.

Rainbow trout

The rainbow trout (*Oncorhynchus mykiss*) is a trout and species of salmonid native to cold-water tributaries of the Pacific Ocean in Asia and North America. The steelhead (sometimes called "steelhead trout") is an anadromous (sea-run) form of the coastal rainbow trout (*O. m. irideus*) or Columbia River redband trout (*O. m. gairdneri*) that usually returns to fresh water to spawn after living two to three
